<i>Dare County</i>	11.2	15.7	10.4	0.8
<i>Hyde County</i>	9.5	13.2	8.2	1.3

Seasonal adjustment removes the seasonal variations in the data, leaving fluctuations that are the result of the economic (structural and cyclical) changes in the economy. The US and North Carolina rates are seasonally adjusted by the US Department of Labor, while the county rates are seasonally adjusted by the [ECU Bureau of Business Research](#).
